

ANI METAL

Engineered for Galvanizing

POLYPROPYLENE TANKS

POLYPROPYLENE TANKS

- Polystone® P (Homopolymer) ROECHLING / German massive polypropylene product
- Compatible with German DVS 2208-1 standards, special PLC controlled butt welding
- Extrusion and fusion method weldings
- Epoxy painted steel reinforcement
- On site welding to reduce the cost of shipping when required
- Material type, thickness and steel reinforcement calculations with RITA programme according to medium - chemical/heat and concentration
- Filling and drainage valves and pipings
- Chemical and water piping connections between the tanks and piping stations
